

We've made some improvements to our website, www.splibraries.org, to make it easier to access electronic resources and library information.

The biggest improvement is the addition of two new menu items, Download & Stream and Research & Learn.

Under Download & Stream, you'll find links to downloadable and streaming content like e-books, music, magazines, and more.

Under Research & Learn, you'll find links to research databases, educational resources, and learning tools for kids and adults.

If you have any questions or comments about our website, please use the Contact link and send us a message.
